

# Shree Bhakta Subedi

📍 **Permanent Address** : Shuklagandaki-06, Khairenitar, Tanahun, 33912, Khairenitar, Nepal

🌐 **Portfolio**   📧 **Email:** [shree.subedi07@gmail.com](mailto:shree.subedi07@gmail.com)   📞 **Phone:** (+977) 9866425513

**Licensed Computer Engineer**, NEC Registration Number: 89522

## EDUCATION

[ 09/2019 – 08/2024 ]   **Bachelor's in Computer Engineering**

**Pokhara Engineering College, Pokhara University**

**Final grade:** 3.72 (**Dean's List**) | **Thesis:** Melanoma Detection Using Convolution Neural Network

**College Rank:** 1

**Related Coursework:** Artificial Intelligence, Advanced Web Technology, Mobile App Development

## WORK EXPERIENCE

[ 25/04/2025 – 25/07/2025 ]   **Internship in Python with Data Science**

**Sipalaya Info Tech Pvt. Ltd.**

- Developed a face mask detection model in Python using convolutional neural networks to classify people with and without masks in real time.
- Collected and preprocessed image data (face detection, resizing, normalization) and trained/validated the model, achieving high classification accuracy.
- Built a simple desktop application (GUI) that connects to a webcam and shows live mask detection results for each detected face.

## SKILLS

Python (Spyder/Jupyter Notebook IDE) | SQL | C | machine learning | CSS | HTML | Git

## PROJECTS

### Smart Attendance System Using RFID Technology

Developed a real-time attendance system using RFID cards and a Laravel-based REST API that validates student entries against a database. Automatically marks attendance and sends email notifications to parents upon student arrival and departure. Improved accuracy and parent-school communication through automation.

**Link:** <https://github.com/rahul0777777/smartattendancesystem.git>

### Melanoma Detection Using Convolution Neural Network

Built a Convolutional Neural Network (CNN) model to classify skin lesion images into benign and malignant categories. Leveraged deep learning for feature extraction and image-based diagnosis. Achieved high classification accuracy, supporting early detection of melanoma through automated analysis.

## HONOURS AND AWARDS

[ 11/2024 ]   **Dean's List**

**Awarding institution:** Pokhara University

Recognized for outstanding academic excellence during the 2025 convocation.

[ 2022-2024 ]   **Academic Excellence**

**Awarding institution:** Pokhara Engineering College

Awarded scholarship for ranking within top 1% in the semester exams of the 2020 batch

## RECOMMENDATIONS

---

**Er. Sandeep Gupta** (Associate Professor)

**Relation:** Project Supervisor for final thesis and junior year research

**Affiliation:** Pokhara Engineering College

**Phone number:** (+977) 9846388216

**Er. Suraj Tulachan** (Head of Computer Engineering Department)

**Relation:** Academic Advisor

**Affiliation:** Pokhara Engineering College

**Phone number:** (+977) 9844775338
